Setup Power BI Connector for SAGE Finance

This connector is for use in Microsoft Power BI Desktop. Microsoft Power BI Desktop has to be installed. It is free for download on the Microsoft Download Website.

To enable Custom Connectors in Power BI Desktop, follow these steps:

Start Power BI Desktop and goto File >> Options

Then, in the Option menu enable the „custom data connectors“

After restarting Power BI Desktop, you'll see the SAGE Power BI data connector, under „Get Data“

The connector is then displayed in the data sources for selection. The connector name is then automatically added to "Beta". This automatically makes Microsoft Power BI Desktop on every custom connector.
